Professional Summary

Aspiring Cybersecurity professional with hands-on experience in cyber security operations, information security, Linux system administration, and technical support. Strong foundation in vulnerability assessment, network traffic analysis, system hardening, security monitoring, and incident response support through practical lab projects and real-world roles. Skilled in identifying security risks, implementing controls, and documenting technical findings. Seeking opportunities in Cybersecurity, Information Security, Security Operations, or System Administration.

Technical Skills

Cybersecurity

- Vulnerability Assessment
- Network Traffic Analysis
- Web Application Security Testing
- Security Monitoring & Threat Detection
- Incident Response Support
- Risk Assessment
- Security Hardening
- Security Documentation

Security Tools

- Wireshark
- Nmap
- Burp Suite
- OWASP ZAP
- Kali Linux

Systems & Administration

- Linux Administration
- System Hardening & Patch Management
- User & Permission Management
- Technical Support & Troubleshooting
- Backup & Recovery

- Database Support
- Basic Network Troubleshooting

Networking & Security Concepts

- TCP/IP • DNS • HTTP/HTTPS
- Packet Analysis • Port Scanning
- Service Enumeration • Log Review
- Access Control

Programming & Tools

- Python • SQL • C++
- Git / GitHub

Professional Experience

Cybersecurity Intern

China Civil Engineering Construction Corporation (CCECC), Nigeria

February 2025 – January 2026

- Supported cybersecurity and IT operations through security monitoring, vulnerability identification, and implementation of best practices.
- Assisted in identifying system and network weaknesses while contributing to data and infrastructure protection.
- Participated in incident response tasks, technical troubleshooting, and security research.
- Contributed to software projects via debugging, database support, and cross-team collaboration.
- Helped strengthen organizational security posture and system reliability.

Information Security Specialist

Gimi Cyber Training Center, Nigeria

May 2023 – Present

- Implemented and supported security controls to protect systems, data, and technical environments.
- Monitored threats, participated in vulnerability management, and supported risk assessments.
- Assisted with incident response, security awareness, and documentation of findings.
- Applied practical knowledge of cybersecurity tools and concepts in a training environment.

System Administrator

KAMTECH Potiskum, Nigeria

January 2023 – January 2025

- Administered and maintained Linux-based systems with updates, patches, and hardening practices.
- Monitored system performance, reviewed vulnerabilities, and provided technical support.

- Managed user assistance, database maintenance, and operational efficiency improvements.
 - Strengthened secure administration and problem-solving skills in a production IT environment.
-

Cybersecurity Projects

Network Traffic Analysis with Wireshark

- Analyzed DNS, HTTP, TCP, and ICMP traffic in a lab environment.
- Documented protocol behavior and suspicious patterns with screenshots and reports.

Vulnerability Assessment Lab

- Performed host discovery, port scanning, and service enumeration using Nmap.
- Identified and documented potential security weaknesses with remediation recommendations.

Web Application Security Testing

- Tested vulnerable web applications using Burp Suite and OWASP ZAP.
- Analyzed HTTP requests/responses and common web vulnerabilities.

Linux Hardening Project

- Applied system hardening practices including service management and permission controls.
- Documented configuration improvements for better security posture.

SIEM and Log Analysis

- Reviewed logs to detect suspicious activities such as failed logins and anomalies.
 - Practiced security monitoring and event correlation techniques.
-

Education

Bachelor of Computer Applications (BCA)

Hindustan Institute of Technology and Science, India
September 2022 – December 2025

National Diploma

Federal Polytechnic Bauchi, Nigeria
May 2021 – November 2023

Senior Secondary School Certificate

Government Secondary School Gimi, Nigeria
February 2017 – December 2020

Certifications

- Certified Information Security – iSACA, May 2026
 - Certified in Cyber Security (CC) – ISC², December 2025
 - Certified Ethical Hacker (CEH) – EC-Council, May 2025
 - Microsoft Office Specialist – January 2025
 - Python Programming – Coursera, January 2024
 - Cyber Security – Khan Academy, January 2024
-

Portfolio

GitHub: [alaval/My-Portfolio](#)

Featured projects include Network Traffic Analysis, Vulnerability Assessment, Web App Security Testing, Linux Hardening, and SIEM/Log Analysis.
